Allowable Subject Matter

1. Claims 1-22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 9, 14, 21, and 22, Bae (6,259,930) discloses an impedance matching circuit connected between an antenna and an RF module wherein the matching circuit comprises a capacitance coupled in parallel to an output of the matching circuit, and an inductor coupled in series between an input and the output of the matching circuit.

Jolly (GB 2 187 042 A) discloses an impedance matching circuit for transmission or reception purposes, wherein the matching circuit includes a transmission line, two inductors and a capacitor connected in series between input/output nodes, a capacitor connected in parallel with the output, and a pair of LC connected in parallel between the transmission line and the inductors.

These references do not specifically disclose an inductor and a transmission coupled between and in series with the input node and the output node, an capacitor (C) connected in parallel with the output in order values of L and C provide an impedance substantially equal to an input impedance of the transmission circuit.

Regarding claims 2-8, 10-13, 15-20, these claims are allowed as being dependent upon independent claims that have been allowed.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
